Extraordinary Properties Exceptional Experiences

Rockefeller Group is known for quality in the built environment, with development expertise spanning industrial, multifamily, office and mixed-use projects nationally. The company's track record extends nearly a century, with roots traced back to the development of Rockefeller Center, a singular development and business address admired worldwide. This rich history has provided the foundation for deep expertise, an influential brand, financial stability through market cycles, and an expectation from all stakeholders for distinctive projects that provide value to partners, clients and communities.

logistics firms.

Industrial Development

Rockefeller Group has been engaged in large-scale industrial property development for more than 40 years, beginning with the partnership to develop the 1.7-million-square-foot International Trade Center in New Jersey. Since inception, the company has developed more than 28 million square feet of class-A industrial real estate for many of the world's leading businesses and logistics firms.

A 400,000 square foot warehouse and distribution facility, completed in 2021 in Middlesex, N.J.

Rockefeller Group has extensive experience obtaining entitlements for industrial development projects nationwide. The company has completed build-to-suit projects for Fortune 500 clients, who emphasize the value of a strong track record, financial stability through market cycles, as well as projects delivered on schedule and within established budgets. Seven U.S. regional offices house the local development, design & construction and leasing teams, providing market-level expertise

to bolster the company's national footprint. Each regional development team has existing relationships in the local markets, and is experienced in all aspects of development. The company plans its projects for the most efficient access from ports and inland distribution hubs to the nation's major population centers. In addition, the company advises businesses and property owners on trade and logistics matters related to Foreign Trade Zones through its FTZ Services subsidiary.

Companies involved in international trade may benefit from Rockefeller Group's 40 years of Foreign Trade Zone expertise.

Navigating FTZs

The financial advantages of operating in an FTZ can drive significant savings, especially in a changing tariff and trade environment. FTZs can help businesses preserve cash flow and offset costs associated with relocation. Rockefeller Group has four decades of experience assisting businesses through the process of FTZ designation or activation. Most Rockefeller Group projects are considered "FTZ enabled," or sites located in the service area of an existing FTZ project under the sponsorship of an existing grantee. FTZ-enabled sites allow for a simplified and faster FTZ designation application process without any fees payable to the U.S. Foreign-Trade Zones Board. More information can be found at ftz.rockefellergroup.com.
